

# Adib Hosn

• Data Scientist •

## About Me

I am a Data Scientist with strong skills in **Statistics** and **Python**, specializing in data processing, preparation, and the implementation of Machine Learning and Deep Learning algorithms. With a **year of experience**, I focus on extracting strategic insights and developing predictive models to enhance decision-making. I excel in **teamwork**, collaborating across teams to drive impactful results. Currently, I am in the penultimate semester of my Bachelor's degree in Computer Science.

## Professional Objective

My goal now is to secure an opportunity at a larger company, in the field of **Data Science**. I am looking for an environment that offers new challenges and learning opportunities, where I can enhance my skills and contribute with innovative solutions. Additionally, I seek a position with growth potential, where I can build a **long-term career** within the company, develop professionally, and expand my knowledge.

## Ceritifications

- Azure Fundamentals (AZ-900)
- Azure AI Fundamentals (AI-900)
- AWS Machine Learning Foundations
- EF Standard Test (C2)

## Technical Skills at my current job

- Programming Languages: Python
- Libraries & Frameworks: Pandas, NumPy, Scikit-Learning, TensorFlow, Keras, Streamlit
- Machine Learning & Deep Learning: Implementation of ML & DL algorithms
- Data Analysis: Data cleaning, preprocessing, and statistical analysis
- Dashboard Development: Creation of interactive dashboards
- Container Orchestration: Management and automation of containers
- Version Control: Git/GitHub/GitLab
- Agile Methodologies: Scrum
- Communication & Project Management Tools: Trello, Microsoft Teams

## Academic

- Computer Science (Bacharelor's Degree) (7th/8th)
- Artificial Inteligent Lab (College)
- Research: Statistical Analysis and Selection of Global Circulation Models for Climate Impact Studies in the Amazon

## Languages

- Portuguese (Native)
- English (Fluent)
- Spanish (intermediate)
